

Info-Sys Link Delivery

Mobile solution for delivery management

Control and improve your business procedures and delivery management using a high technology solution that will allow you to stay in permanent contact with your trucks.

This solution provides reliable follow-up of your delivery efficiency and can be used through devices in your delivery trucks. Specifically created for fuel products distribution, Info-Sys Link Delivery can be used with one or many products and can be operated using more than one meter. Intuitive and easy to use for delivery, the application provides a complete control of tank inventory.

Completely integrated with our business software, Info-Sys Enterprise, all Info-Sys products provide a global solution for your company.

Benefits

Reduction of dependency on printed documents by creating a paperless environment

Optimization and better control of deliveries

Communications in real-time between the back office and the truck

Simplification of delivery management.

Centralization of tasks streamlines the delivery process

Decreased operating costs

Improvement of productivity and efficiency through automated processes
